Kid Cudi Accused of Defamation by Actress Marina Klirman
Marina Klirman has filed a defamation lawsuit against noted MC Kid Cudi, claiming that he accused her of lying during an argument on stage. According to The Blast, Klirman filed a lawsuit in August accusing Kid Cudi of saying that "I don't believe you" during an argument. In the complaint, Klirman alleges that before she could respond, Kid Cudi said that he didn't believe her "because you're lying." She says that his remark caused her to become physically ill. Kid Cudi allegedly stated that it wasn't her job to say "I believe you" to others. Klirman claims that the statement injured her reputation and caused her to suffer emotional distress and lost sleep and profits because she had received bad reviews. She is seeking more than \$50,000 in damages, and lists the rapper's label, Loud Records, as defendants.

Klirman, an actress, is known for appearing as the Russian seductress Lux on HBO's Boardwalk Empire. She is also the star of the hit Mexican reality show Familia Klirman, which was released in April on Showtime. Ask HN: Are my documents accessible from the internet if the website is hacked?

- vivial I've recently come across a website which (amongst other things) allows you to upload documents. Is it possible for anyone to download a file that was uploaded to this site? Not necessarily make it publicly available, just to view it. ===== bdfh42 Well if the site has PHP enabled and that is used in the upload then it is possible to extract the php source code and see what is going on. for minimising the expense and maintaining the autonomy and mobility of the patient and, in particular, to ensure unobstructed patient care, while meeting the demands of patient safety. Lastly, the study will provide data on the capabilities of the KSE system, as well as the performance of individual parameters that are critical in patient care. Participation in the study is voluntary, and confidentiality is to be ensured. The participants are informed about the study protocol and procedures, as well as the extent to which the results will be used, and they can at any time withdraw their data or refuse to take part in the study without any negative consequences. The data are managed by four independent research institutions (independent
